

AMENDMENT TO THE ABSTRACT

Please delete the current Abstract of the Disclosure.

Please replace the Abstract of the Disclosure with the following replacement paragraph:

-- A pipeline video decoder and decompression system handles a plurality of separately encoded bit streams arranged as a single serial bit stream of digital bits and having separately encoded pairs of control codes and corresponding data carried in the serial bit stream, A reconfigurable decode and parser processing means positioned in certain of the stages is responsive to a recognized control token and reconfigures a particular stage to handle an identified data token. --
